## Dark Skies over Skye

"Dark Skye Scotland": The low levels of light pollution in many parts of Scotland make it the best area for "dark skies" in Western Europe.

Stargazing at Uig and, indeed, throughout the Isle of Skye, can be superb with vast numbers of stars visible on clear nights far in excess of what you'll ever see in towns and cities.

Information regarding the "Dark Sky Scotland" organisation can be found by visiting http://www.darkskyscotland.org.uk
